

THE SPEECH PATH

PEDIATRIC SPEECH THERAPY

We are a private therapy group dedicated to helping each individual thrive by educating the individual, their families and their communities on how to have a daily positive impact on one another. We are honored that we get to do exactly that with the wonderful St. Mary's community again this year. In addition to preschool based therapy, we also provide in-home private therapy and clinic based therapy for all ages. We have early intervention therapists (birth-three), preschool therapists, elementary school therapists, therapists for the teenage years as well as therapists that serve infants, children and adults with oro-facial myofunctional needs (tongue-tie, mouth breathing, snoring/teeth grinding, picky eating). We have a holistic approach to therapy. Our clinic setting has a sensory gym and is a very peaceful, positive and inviting environment. Our team also includes feeding specialists, oro-facial myofunctional therapists, occupational therapists and a physical therapist. We believe in tailoring the therapy to each individual's needs and carefully matching that individual's specific needs with a therapist's specific passion. We are here for you!
